T R I T O N

INTRODUCING TRITON. AN EXTRAORDINARY UNION OF NAVAL ARCHITECTURE, ADVANCED TECHNOLOGY AND, MOST OF ALL, IMAGINATION.

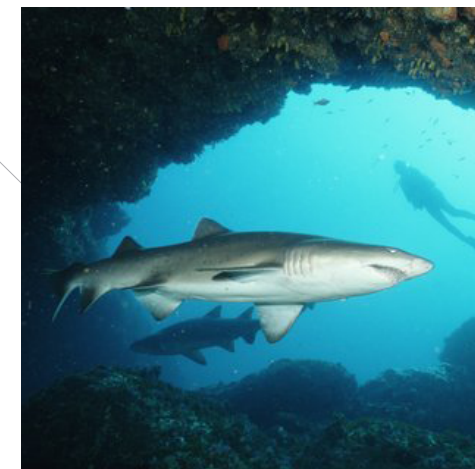

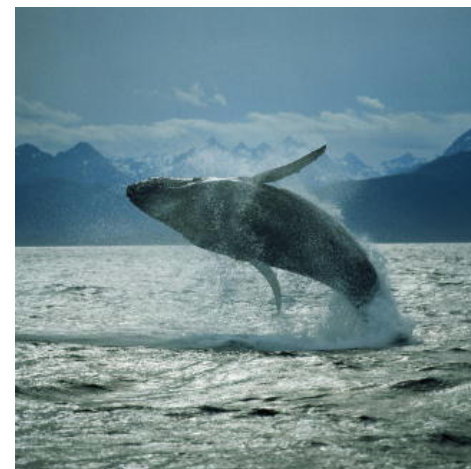

a triumph of artistry and design

Experience a yacht that is a truly unique invention. Beautifully sculptured in form and stealthily appointed in functionality, the 163 foot *Triton* is the largest composite megayacht built in the U.S. *Triton* is as gracious an entertainer as she is a sport fishing and diving enthusiast, thanks to her many convertible spaces and advanced technology. A striking union of advanced marine design and more than anything, imagination, *Triton* is aptly named for the mighty ruler of the sea.

dive deep into adventure

Built for hardy enjoyment of the great outdoors, *Triton* is designed for worldwide cruising, deep-sea fishing and exotic reef diving. The sunken fishing cockpit features two game chairs, a cleaning station and a live bait tank. For the diving enthusiast, *Triton* boasts a sophisticated dive compressor with Nitrox and Tri-Mix capabilities, as well as a hydraulically deployed dive platform for ease of entry and exit from the water.

Outdoor entertaining areas that never end, a hot tub, a bar and plenty of room to soak up the sun. Owners come to Delta knowing they can request exactly what they want, and Delta loves the challenge of making their dreams a reality.

The sky deck can be opened up completely for outdoor entertaining, or completely enclosed with acrylic glass and air-conditioned.

thoroughly entertaining

Triton's versatile skylounge exemplifies this yacht as a hallmark for creative design, as it integrates the best of indoor and outdoor recreation. Enclosed and air-conditioned, it's the perfect setting for intimate entertaining, or the area can be completely opened up to bring in the full beauty of the surrounding environment. The best of all worlds and all dreams is realized: *Triton* is a masterpiece of ingenuity and innovative thinking.

3500 LB KNUCKLE BOOM CRANE

Heavy duty crane has a low profile but a lot of power. This crane allows crew to load/unload tenders, other watercraft, motor vehicles and supplies on board while in port.

CROW'S NEST

Constructed of 100% carbon fiber, the crow's nest provides a direct line of sight to the fishing cockpit. Here guests can watch the sport fishers below while the crew is equipped with full steering controls.

KAYAK STORAGE

Utilizing maximum space and storage onboard, this area located below the crow's nest provides storage for kayaks or other small watercraft.

LIFT

This electro-hydraulically powered lift shuttles guests to and from the crow's nest. Its unique design ensures safe and easy use of the crow's nest even while underway.

OVERHEAD GANTRY CRANES

In order to maximize space on the aft deck and allow for an unobstructed fishing cockpit, the overhead gantry cranes were designed within a cantilevered structure. The deck, supported by steel columns and reinforced with carbon fiber, is capable of withstanding enormous loads.

STERN TOWING WINCH

Transom-mounted stern anchoring/towing winch tows tenders while underway or serves as a stern anchor when needed.

UNDERWATER CAMERA & LIGHTS

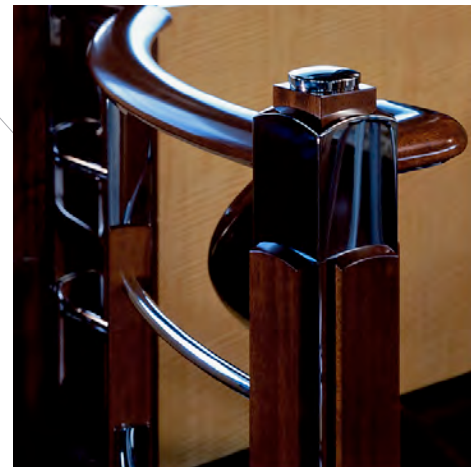

Aimable underwater cameras & lights located at both stern and bow, capture the adventures of life under water on video.

TENDER DEPLOYING SYSTEM

This unique hydraulically deployed tender towing system was designed especially for the owners of *Triton*. With a boom and self-tailing winch, *Triton's* crew can deploy the tenders underway to chase a fighting fish or hurry off to the next adventure.

BULBOUS BOW

Typically found on full-displacement yachts such as here on *Triton*, bulbous bows allow for improved fuel efficiency and increased boat speed, and serve as a trimming ballast tank.

details and personality

The dining area is enveloped by the credenza and cabinetry, which provide a handsome canvas for the interior design's inventive mélange of styles. An intimate dining nook in the gourmet kitchen is perfectly suited for guests and crew alike.

A mixture of art deco and nautical elements . . . a hint of the sculptural brilliance you see in classic architecture . . . added lighthouse effects with the polished stainless scones.

art and innovation

The interior, designed by the Delta Design Group, features an exquisite reinvention of art deco, enhanced with nautical accents. Rich mahogany of varying species create a sumptuous spell of texture and detail. Gleaming stainless steel nuances hint at the sculptural beauty found in early twentieth century skyscrapers.

Blend different mahoganies and sumptuous textures. Exquisite details meet the eye at every turn. Master bedroom suite created a haven, a private retreat. Formal writing desk, lounging area, a place to decompress when the yacht is full.

inspiring and transporting

Triton's comforts and luxury extend throughout the sleeping quarters, giving her owners and guests the ultimate yachting experience. The guest rooms are thoughtfully designed with bathroom and dressing areas separated, allowing for both efficiency of space and convenience. Each stateroom is equipped with Pullman berths for couples traveling with children, or to accommodate extra guests. These are just part of the abundance of gracious and welcoming touches *Triton* offers her guests — along with a journey wholly remarkable . . . and unforgettable.

GALLEY

Triton's galley is well-appointed for function and luxury. Detailed in the same finishes and rich mahoganies throughout the yacht, the galley's large breakfast nook and coffee bar serve as a popular area to relax for both guests and crew. When entertaining large parties, this area can be divided by a sliding wall panel to enclose the working space of the galley or give added privacy to the crew. When open, it reveals a large comfortable place to congregate.

ENGINE ROOM

The engine room represents a well thought-out design and space layout that allows for ease of use and maintenance. Equipment is easily accessible; the engineer has a large work station insulated from the sounds and vibration while underway, and there is plenty of headroom and space for crew or technicians to work together to maintain the yacht in ideal condition.

In addition to the working requirements of this space, it too maintains the same level of detail and adventure as the rest of the yacht. The exhaust laggings are detailed in polished stainless steel and much attention has been spent on location for the complex dive system, gear and other equipment for adventure including Yamaha under water scooters and a great-white shark cage.
